Using Knowledgehook Remotely

ADMINISTATOR CHECKLIST

☐ **Set up an implementation team**
This team should establish communication channels with parents, teachers, and students, to communicate expectations.

☐ **Plan how students will connect from home**
Some students may not have reliable internet or access to devices from home. Work with parents and your technology team to identify possible solutions or to provide devices.

☐ **Create a Content Library**
Prepare a list of content or create your own content library on Knowledgehook to provide material for learning remotely.

☐ **Share Knowledgehook with your Teachers**
Have your teachers create their free accounts and begin accessing your content library.

☐ **Discuss Best Practices for Remote Learning**
Talk with your teachers to identify what is working well for managing content, communication, and engaging students.
